To whom it may concern,

As a resident of Naramata, I am writing to express my opposition to the proposed construction of a 30 km. gas line expansion to Chute Lake from Ellis Creek. This expansion goes against Penticton's (as well as BC's and Canada's) commitment to net zero carbon emissions by 2050. This expansion will encourage greater use of natural gas and its core component methane, a very harmful greenhouse gas. Therefore, I strongly urge the RDOS and the city of Penticton to say "NO" to this proposal and "YES" to increased use of renewable electric energy.

Best regards,
Judy Cooke
