Penticton, B.C.
V2A 5J9

Dear RDOS Directors:

Regarding the rezoning of two 5-unit buildings to one 10 unit building.

I support the rezoning application as a positive avenue to uphold the agricultural land goals of the RDOS. I believe that the rezoning from two properties to one will be the most effective way to preserve the agricultural integrity of the land. Being a farmer myself, it is critical to my livelihood and to this unique area we call home, that we keep as much land open for agriculture as possible. Therefore it is extremely clear to me that the one building plan is a much more responsible option that leaves the second parcel of land open for its intended agricultural use.

Sincerely,

Kim Kriese

Osoyoos, BC

Dear RDOS Directors:

Re: Rezoning to allow one 10-Unit Agri-Tourist Accommodation Building Rather than two 5-Unit Agri-Tourist Accommodation Buildings – 14805 89th Steet, Osoyoos

I am aware that the owners of 14805 89th Steet, Osoyoos have applied to rezone the property to allow one 10-unit agri-tourist accommodation building rather than two 5-unit tourist accommodation buildings and I feel it makes sense to consolidate the facilities into one rather than having two separate buildings on two separate adjacent properties. I understand that the proposal is consistent with the Agricultural Land Commission Act and its Regulations, and I feel that the promotion of agriculture in rural Osoyoos is good for agriculture and the local agricultural economy. In addition, I believe that one building will have less impact on agriculture than two separate buildings, as the footprint will be less, leaving more land for agricultural use.

I fully support the proposal to allow one 10-unit agri-tourist accommodation building on 14805 89th Steet rather than two 5-unit tourist accommodation buildings on two adjacent agricultural parcels.

Dear RDOS Directors:

Re: Rezoning to allow one 10-unit building rather than two 5-unit buildings

I have been made aware that the owners of 14805 89 th St., Osoyoos, have applied to rezone the property to allow a single 10-unit agri-tourist accommodation on one lot rather than two separate 5-unit buildings on adjacent lots. Given that the RSOS seeks to preserve agricultural land, it makes sense to me that the structure would be located on a single lot, leaving the other lot available for agricultural use. Building separate 5 units buildings on two lots seems to me to defeat the agricultural land goal of the RDOS, since both properties would then have limited agricultural application. Therefore, I support the consolidation into a single building on one of the lots.

Regards,

James McConnell

I am aware that the owners of 14805 89th Steet, Osoyoos have applied to rezone the property to allow one 10-unit agri-tourist accommodation building rather than two 5-unit tourist accommodation buildings and I feel it makes sense to consolidate the facilities into one rather than having two separate buildings on two separate adjacent properties. I understand that the proposal is consistent with the Agricultural Land Commission Act and its Regulations, and I feel that the promotion of agriculture in rural Osoyoos is good for agriculture and the local agricultural economy. In addition, I believe that one building will have less impact on agriculture than two separate buildings, as the footprint will be less, leaving more land for agricultural use.

I fully support the proposal to allow one 10-unit agri-tourist accommodation building on 14805 89th Steet rather than two 5-unit tourist accommodation buildings on two adjacent agricultural parcels.
