## **Temporary Use Application – Vacation Rental – 2024**

May this letter serve notice for the renewal of our Temporary Use Permit for the upcoming 2024 calendar year. This application follows two consecutive years (2022/2023) of RDOS approval of a TUP on our residential property.

The details of the past years TUP approval have not changed and as such the original approval package has been included in the resubmission of this paperwork.

We are a retired couple who live in the principal home designated as 3057 Naramata Road. Contained within borders of this approximately 2.4 acre property is a small cottage (3059 Naramata Road) which serves as a guest cottage for friends, family and vacation rentals when there is availability May through October.

The guest cottage is the source of this application for a new TUP. There have been no changes to the cottage in the past two years. Both health and safety and septic inspections were completed in the prior submission. With over 25 groups of visitors staying with us over the past two years there have been no concerns brought to our attention. We live permanently on the property year round and are always present when the cottage is occupied.

As a fixed income couple we depend upon the additional income from Okanagan vacationers to supplement our retirement. Thank you for your continued consideration in this matter.
