

WATERMAIN FLUSHING

OKANAGAN FALLS WATER SYSTEM

LOWER ZONE

Effective October 15, 2024

October 8, 2024

RDOS Public Works will be commencing the fall watermain flushing program the week of October 15, 2024. This program will only be addressing watermains in the **Lower Zone**. The Upper Zone will be scheduled to be flushed in the spring of 2025. If you do encounter sediment and discoloration in your water, the RDOS asks for your patience until the flushing program is complete and to follow the recommendations listed below.

Residents may observe some discoloration or sediment in the water. If you experience dirty water, simply run your cold water taps only and/or garden hose until the water runs clear. Minimizing the amount of hot water usage will limit the amount of sediments that could potentially settle out in your hot water tank. Residents may also wish to isolate in-home treatment systems during the flushing program until turbidity has decreased to normal levels. Additionally, residents should check the water quality before laundering clothing during this time to minimize potential staining or discoloration.

Residents are advised to use a safe alternate source of water for preparing baby formula for infants and young children if water is discoloured or turbid, due to the potential for elevated manganese levels.

For further information, please contact RDOS Public Works at 250-490-4135 during regular business hours, 8:30 am to 4:30 pm, Monday through Friday.

For after-hours water emergencies, please call RDOS Regional Dispatch at 250-490-4141.

Thank you for your cooperation.
